### Watch Our Video:

### Available on Desktop, Tablet, Mobile

### Focus on Coaching

High school coaches and athletic departments use athleticcloud to simplify their work so they can concentrate on providing the best possible experience for student athletes.

### Manage Team Payments with School Banker

Organize, track, and accept payments for everything from "spirit pack" sales to tournament fees. With School Banker, **your school pays nothing** to receive money for activities and events.

Request a new payment, and your athletes' parents receive mobile notifications that bring them to a secure, online credit card portal. The system tracks who has paid for what and provides automatic receipts. Coaches can also enter payments by cash and check.

### Keep Mobile Attendance Records

With athleticcloud, you can quickly mark athletes "Present," "Late," or "Absent" on your mobile device.

One coach can take attendance for an entire team, or multiple staff members can split their team into smaller groups, taking attendance simultaneously. Automatically organize and merge attendance information to provide reports by team, athlete, location, or date range.

### Equipment Tracker Saves Your Team's Budget

Lost equipment can cost a high school athletic program thousands of dollars each year. athleticcloud saves money by keeping your inventory accurate and up-to-date.

Use athleticcloud to see at a glance where items are and whether they're overdue. Track the condition of equipment, find out what items you need to order, and automatically remind athletes and parents when it's time to return equipment.

#### Emergency Contacts

Coaches have immediate mobile access to medical and emergency information for athletes with one-touch texting and calling to reach emergency contacts quickly.

#### Academic Eligibility

#### Athletic Calendar

### A Team Win for Coaches, Athletes, and Parents

athleticcloud improves the athletic experience for everyone. It gives coaches more time, high schools more resources, athletes more information, and parents more assurance.

## Start Using athleticcloud

To be released early 2014
