## TOUCHSTONE™ LED Light

<<Lead Paragraph >>

NuWhirl's TOUCHSTONE LED Light transforms the entire bathtub with a wide spectrum of high-intensity colors. Its convenient smaller housing can be mounted nearly flush to the tub's surface and serviced from the front.

<<Features / Benefits>>

**Brighter, Far-Reaching Light.** Provides outstanding luminosity across a spectrum of RGB colors plus improved brightness in every part of the bathtub.

**Efficiency.** Uses fewer LEDs than older lighting solutions while making a comparable impact.

**Design Flow.** Mounts nearly flush to the tub wall to fit cleanly with its shape and surface.

**Adaptable Build.** A smaller body accommodates both thin and thick tub walls. Connect multiple lights easily without loss of brightness.

**Convenience.** Front serviceable for ease of access. Lens removal tool included with each light.

**Cost Effectiveness.** Housing design can eliminate tool changes in production. Also, fully integrates with existing TOUCHSTONE controls without an additional transformer.

**Proven Technology.** cULus certified. TOUCHSTONE controls have supported customers for over 25 years.

**Immediately Available.** Product in stock. No minimums. Same-day shipping available.
