TOUCHSTONE™ LED Light

NuWhirl's TOUCHSTONE LED Light transforms the entire bathtub with a wide spectrum of high-intensity colors. Its convenient smaller housing is nearly flush to the tub's surface and serviced from the front.

Features and Benefits

Brighter, Wide-Angle Light Outstanding luminosity across a spectrum of RGB colors plus improved brightness in every part of the bathtub.

Efficiency Uses high-power LEDs that are better than older lighting solutions while making a comparable impact.

Contemporary Mounts nearly flush to the tub wall to fit cleanly with its shape and surface.

Convenience Front serviceable for ease of access.

Adaptable Build A smaller body accommodates both thin and thick tub walls. Connect multiple lights easily without loss of brightness.

Cost Effectiveness Standard housing diameter reduces tool changes in production. Also, fully integrates with existing TOUCHSTONE controls without an additional transformer.

Immediately Available Product in stock. No minimums. Same-day shipping available.

Exceptional service support: TOUCHSTONE Controls are supported by the best engineering, sales and customer care in the Whirlpool Bath industry for over 25 years.
