## **TOUCHSTONE® Electronic Controls**

***Simple Installation. Modern Design. Complete Customization.***

TOUCHSTONE electronics operate every luxury bath feature while reducing costs, complexity, and production time

--

## Why Bathtub Manufacturers Love TOUCHSTONE® Electronic Controls

NuWhirl's comprehensive line of feature-rich bath controllers, standalone units, and keypads.

**Customizable components.** By choosing how your TOUCHSTONE parts operate and look, you can build bathtubs efficiently, cost effectively, and in a way that distinguishes your products.

**Streamlined design.** TOUCHSTONE parts support many features but keep a small footprint. Manufacture your bathtubs without the complication of additional wiring and mountings.

**Exceptional value.** Our parts provide outstanding functionality while reducing material, labor, and installation costs for bath manufacturers.

Explore our components, and learn more about why manufacturers love TOUCHSTONE.

## Feature-Rich Bath Controllers

### One Box. One Plug. One Solution.

Manufacturers that have to inventory and switch out controllers for each of their bathtub models face increased expense, production time, and chance of error.

With TOUCHSTONE®, there's no need for stocking and swapping multiple types of controllers.

Customize our feature-rich controllers right from the production line with one-of-a-kind "selection software." TOUCHSTONE accommodates dozens of features, like single and multi-speed, LEDs, and timers.

Smart design simplifies installation. TOUCHSTONE is the only one-box system powered by a single NEMA cord. The controller takes two loads totaling 15 or 20 amps, plus LED lights, with no messy wiring required.

## **Customizable Electronic Keypads**

### **All-in-One Control Over Feature-Rich Bathtubs**

TOUCHSTONE keypads offer a simple, beautiful, and cost-effective way to operate jets, air blowers / pumps, and other features.

Add logos, change colors, and more: overlay graphics and the configuration software are 100% customizable.

If speed and price are the priority, standard design keypads are an attractive alternative that's ready to ship with no ordering minimums.

#### ***GEN II***

## Standalone Controllers

TOUCHSTONE has designed each standalone unit to simplify installation, support bath features with a smaller footprint, and reduce the overall expense of manufacturing. Excellent quality and innovative design make it all possible.

### ***COMMAND FLOW (CIMC-288 SERIES)***

Variable speed pump controller with LED and temperature sensing options.

### ***COMMAND AIR (CIMC-213 SERIES)***

Air massage controller with LED and temperature sensing options.

### **ADDED HEATER & LIGHT CONTROLLER**

### ***COMMAND WATER (CIMC-263 SERIES)***

Simple on/off control with optional LED. Ideal for ***single-speed pump applications.***

### ***CAST AIR-ACTIVATED CONTROLLER (CAST-201 SERIES)***

Air massage or water pump operated by air switch.

### ***ADDED LIGHT CONTROLLER***

### ***AUXILARY UNITS (CIAU SERIES)***

Link any controller and simply add features such as pumps or air blowers.

### ***SOLENOID DRIVER (CISD SERIES)***

Operate up to four solenoids for back jets, pillow jets, and waterfall features.

## **Build Great Bathtubs Better with TOUCHSTONE®**

NuWhirl Systems Corp is a leading producer of innovative, high-quality bath components, including the TOUCHSTONE® line of electronic controls.

We make it easy for bath manufacturers to transition to NuWhirl. It's one of the reasons nearly 70% of the industry partners with us.

Manufacturers choose NuWhirl because our components and systems offer the reliability and features their customers want. We also:

- Maintain a reasonable lead time with all parts.
- Place no order minimums on standard products
- Offer free freight on orders over \$10,000.

Contact our sales team to explore TOUCHSTONE and all of NuWhirl's products.
